

VIRTUAL TOWN HALL

THE NEED FOR SPEED?

How a Few Miles Per Hour Makes a Difference

Friday, October 23 • 11 a.m. - 12 p.m.

Going faster doesn't get you there sooner, but it does increase your risk on the road. A difference of just three miles per hour can help avoid a crash and drastically reduce the risk of severe or fatal injuries. The speed you choose can have a direct effect on the traffic around you.

MODERATOR: **Ron Esposito**, Traffic Safety Specialist, AAA Northeast

SPEAKER: **Arnold Anderson**, Community Traffic Safety Program Coordinator, New Jersey Bike & Walk Coalition
